

CYBERGENE AB

# ChromoQuant<sup>®</sup> Visualizer<sup>™</sup> software

*A powerful genotyping  
decision support system*

## *Key advantages*

- **Fast and objective analysis of data**
- **Full traceability of data from your Visualizer Visualizer<sup>™</sup> database**
- **Built in interpretation based on CMGS\* Best Practice Guidelines**
- **Integration with LIMS**

- Objective analysis of data
- Fast diagnosis of chromosome aneuploidy
- Full traceability and quality control
- Storage of all data in database
- Results can be exported to patient handling system (LIMS)
- Licensed to all ChromoQuant<sup>®</sup> users for free

### **Decision support system**

The Visualizer<sup>™</sup> software imports analysis data from GeneMapper<sup>™</sup> (ABI) and Genetic Profiler<sup>™</sup> (MegaBACE<sup>™</sup>). By using Visualizer<sup>™</sup> your analysis work will be performed automatically and the results will be interpreted objectively. Visualizer<sup>™</sup> will be a support in approving the results obtained by the ChromoQuant<sup>®</sup> QF-PCR kits.

### **Database with full traceability of data over time**

Your Visualizer<sup>™</sup> software will also function as a database and offers a secure storage of the data with full traceability over time. The results can even be imported into your patient handling system.

### **Fast and objective interpretation of data**

The objectivity is a result of the built in interpretation rules, based upon the guidelines set up by the Clinical Molecular Genetic Society "CMGS Best Practice Guidelines for QF-PCR for the diagnosis of aneuploidy".

### **ChromoQuant analysis**

Visualizer software is compatible exclusively with data generated by the ChromoQuant QF-PCR product family, including 311.003 and 412.002 kits.

\*CMGS. Clinical Molecular Genetics Society.

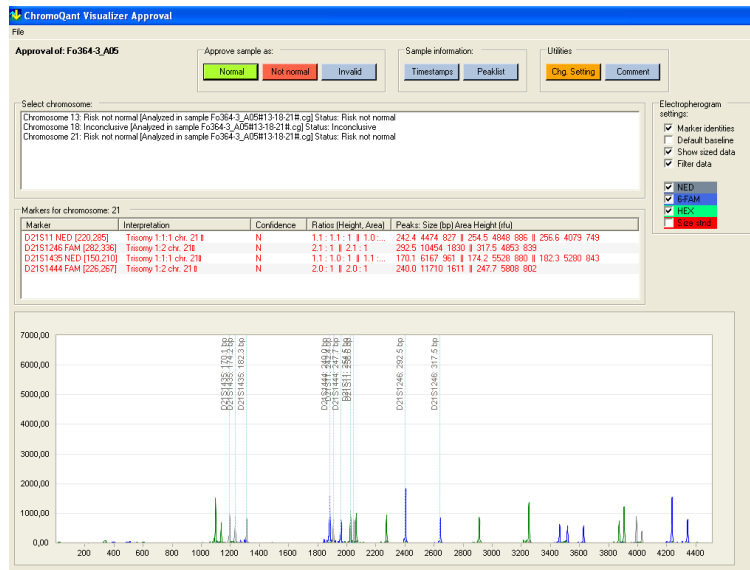

ChromoQuant<sup>®</sup> and Visualizer<sup>™</sup> are trademarks of CyberGene AB. GeneMapper<sup>™</sup> is a trademark of Applied Biosystems. Genetic Profiler<sup>™</sup> and MegaBACE are trademarks of GE Healthcare.

## Visualizer™ Work flow

Example of data from Visualizer™

## Features

<b>Automatic genotyping</b>	Yes
<b>Interpretation rules</b>	CMGS* Best Practice Guidelines for QF-PCR for the diagnosis of aneuploidy
<b>Compatible DNA analysis softwares</b>	GeneMapper (ABI), Genetic Profiler (MegBACE), GeneScan (ABI)
<b>Storage in database</b>	Yes
<b>Integration with LIMS</b>	Yes
<b>Licensed to all users</b>	Yes

### About CyberGene AB

CyberGene AB is active in the MedTech field by developing, manufacturing and selling In Vitro diagnostic products. CyberGene AB is also a service provider within the Biotech field in oligodeoxynucleotide (DNA) synthesis.
